

## Exam Information

### Practical Course I / II WT 19/20

#### **Qualifications:**

Students of the RWTH master program have to take a combined exam for the practical course including practical course I and II. It is not possible to have separate exams for the courses. Only students who have attended at least 75 % of the lectures (introduction and laboratory) of practical course I and II are permitted to take part in the exam.

#### **Exam Contents:**

120 multiple choice questions (practical course I and II – 60 questions each). The contents of both lecture notes as well as the contents of the introductory and practical lessons are relevant for the exam. A few example questions will be published in RWTHmoodle.

#### **Exam information:**

- 120 tasks with 120 points total
- Duration: 120 minutes
- Tools permitted: writing & sketching materials, compass and ruler
- Only the calculators on the positive list of the "Institut für Geometrie und Praktische Mathematik of RWTH Aachen University" are allowed to be used during the exam ([https://www.igpm.rwth-aachen.de/Numa/NumaET/tr\\_2019f.html](https://www.igpm.rwth-aachen.de/Numa/NumaET/tr_2019f.html)).
- Usage of permanent writing instruments (e.g. pen) required; red or green color is not allowed
- For the verification of your personal data please bring your identity card as well as your student identity card.
